

2010 Beginning Fire Sprinkler System Planning School

April 19-30

July 12-23

October 11-22

The System Planning School presents a comprehensive, practical approach to preparing fire sprinkler system drawings.

Students receive two full weeks of instruction, 60% of which is study & review of NFPA 13 (2010). The other 40% is preparation of fire sprinkler system layout, shop drawings and hydraulic calculations. The school is designed to train a beginner to be productive immediately upon returning to work.

This class is geared towards those with limited experience who need assistance with design & those wanting to refresh their experience.

Training Facility Location:

AFSA Headquarters – Dallas, TX

Hotel Location: Staybridge Suites

Special AFSA Group Rate: \$79.99/night + tax

To make hotel reservations: 972-391-0000

Maximum enrollment of 15 students per school. Many 2009 Design Schools sold out well in advance! **ENROLL EARLY!**

The students learn by actually planning & drawing sprinkler systems while studying & applying NFPA 13 ('10 Ed.).

This school will prepare the student to:

- Accelerate the comprehension of plans & various types of building construction for proper sprinkler spacing applications.
- Determine the proper & economical planning of fire sprinkler system layout & installation methods.
- Know the importance of sprinkler specifications, types of pipe, hangers, fittings, flow tests, etc.
- Learn to develop shop drawings from start to finish.
- Learn to coordinate with other trades – plumbing, mechanical, structural, & electrical.
- Perform manual Hydraulic Calculations. This prepares the student for an easier decision-making process when using a computer to perform hydraulics.
- Prepare shop drawings in class for projects with different applications.
