

July 20, 2022

Dear Talco Fire Systems Distributor:

Due to cost pressures and industry increases we will be implementing a price increase effective with all orders received on or after September 1, 2022.

Prices for all orders received and accepted through end of day August 31, 2022, which are based on current pricing, will be honored. Updated PDF copies of new list price sheets incorporating this increase will be distributed within two weeks.

You will see a couple of changes on this upcoming price list. First, we will be adding our new FTS (Flow to Start) line of booster pumps specifically designed for increasing pressure from the municipal water supply. Next, for items with RFQ listed, please call us for quotes on these items, since the availability of these products have been very volatile to fluctuations in the marketplace.

We appreciate your business and loyalty and look forward to providing quality products and service to you in 2022 and beyond.

Sincerely,

James Yost

Talco Fire Systems
